

The Democrats' War on Parents and Children

Social Activist, Democrat Party Surrogate, and American Federation of Teachers (AFT) president Randi Weingarten caterwauling about why **truck drivers** should be forced to pay off the **student loans** of **lawyers**.

The Democrats' War on Children:

It's become pretty clear that the nation's teachers' unions (the NEA and AFT) and the Democrat Party are pretty much one and the same. When it comes to **math** and **reading**, our nation's public-school students have never been in **worse shape**. Instead of effectively teaching our kids useful things, the teachers of the NEA and AFT have been **indoctrinating** our kids. CRT and Intersectionality? Absolutely! Geometry? Not so much.

Your parents brought you up to be **PROUD TO BE AN AMERICAN**? Not so fast little Emily! Don't you realize your country is just an **overgrown slavery plantation**? *Btw, before you accuse me of trying to "whitewash" over the **abomination of slavery**, try reading the first eight chapters of this book.*

The extent to which our **public schools have gone off the rails** was made clear to us parents during the COVID Lockdowns. Online classes were a **revelation**. For the first time, many parents could actually see for themselves the **woke nonsense** being pushed by the NEA and AFT onto their poor children. Nothing better exemplifies this than the NEA/AFT's asinine and **DISGUSTING** Transgender agenda. I am reminded of this old joke. While it may not be that funny, it sure as heck is **profound**:

Q: What do you call a confused 12-year-old?

A: **NORMAL!**

NEWSFLASH: Confusion about one's identity/ place in the world is a normal and **necessary** part of growing up. The only "transition" America's young people need to worry about is the transition from **childhood** to **adulthood**. It sure as hell is not the job of our government employees (public school teachers/administrators) to convince our nation's adolescents (*and younger*) that maybe they are a girl trapped in boy's body. Here's an idea: **Try teaching them math and science instead!**

By the way, if you are age 18+ and want to get **non-taxpayer-funded** sexual reassignment surgery, go ahead and knock yourself out. I and millions of other libertarian/conservative minded Americans don't really care. On the other hand, if you are a medical professional who facilitates the **SEXUAL MUTILATION** of a minor child? You need to spend some quality time in prison.

The Democrats' War on Parents: Totalitarian societies have long tried to get between the parents and the child. Children in Germany's Third Reich were shuffled off to the Hitler Youth. Elementary school students in the Soviet Union were highly encouraged to rat out their parents if their parents did or said something "*not aligned*" with the interests of the Communist Party. Today's Democrats are also trying to get between the parent and the child. Virginia gubernatorial candidate Democrat **Terry McAuliffe** said the "quiet part out loud" in September 2021:

**"I don't think parents should be telling schools
what they should teach."**

Fortunately, the good people of Virginia told Terry **where to go and how to get there** in the Nov. 2021 Gubernatorial Election. In a state which had been growing increasingly **blue**, Republican **Glenn Youngkin** defeated McAuliffe by 64,000 votes. McAuliffe was **successful** in one way though. He was **successful** in showing what the AFT, the NEA, and the Democrat Party really felt and feel about parents who want a say in their child's education.

The NEA's, AFT's, and the Democrat Party's disdain for parents is probably best exemplified by their asinine **book banning** narrative. Apparently if a parent wants a say as to what their kid reads (or does not read) that parent is for the **banning of books** and is therefore **Anti- Free Speech and the First Amendment**.

Only a bona fide **idiot**, a delusional person, or a severely dishonest individual could make (or buy) the argument that parents not wanting **their tax dollars** to go to the local school's purchase of a sexually graphic book (*or any book for that matter*) is **book banning**. Folks, by this "logic" let all your local public school officials know that they need to use **taxpayer funds** to buy each student a copy of **The Common-Sense Guide to American History**. *Btw the COMMON-SENSE "PANDEMIC" this would unleash would make this the WISEST expenditure of Taxpayer Funds since George Patton last drew a U.S. Army salary.* Then, when they refuse? Accuse them of **BANNING MY BOOK!** How's that for a marketing ploy? Ha!

For more, check out [The Common-Sense Guide to American History](#).
